Our mission.

We seek to extract diversified sources of alpha from alternative investment strategies and deliver them in a lower-cost daily liquid UCITs vehicle.

What

Absolute returns over a full market cycle from a combination of Strategic Alpha and Tactical Alpha. The Fund seeks to deliver cash+5% on a gross basis.

Why

Because a **key driver** of returns/alpha for alternative investments is **dynamic asset allocation** across broad asset classes (Equities, Fixed Income, Currencies).

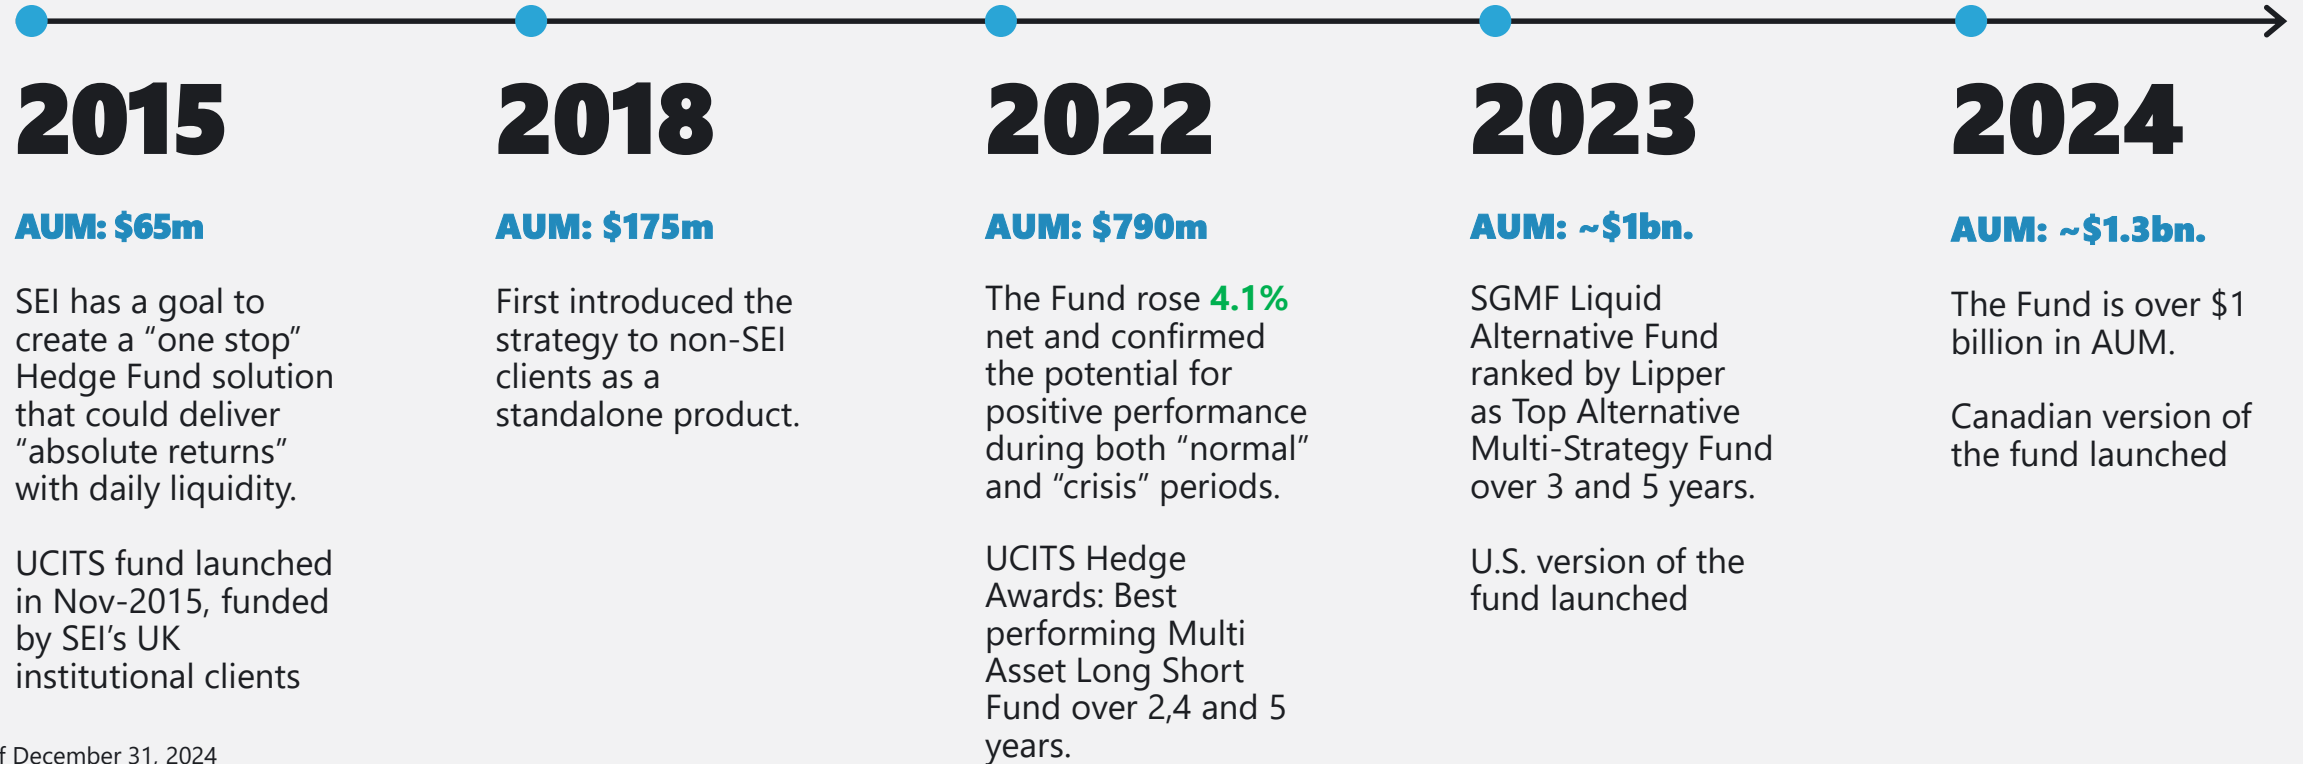

How

Seeks to replicate a substantial portion of pre-fee returns of a target portfolio of alternative investments and seeks to outperform through lower fees and trading efficiencies.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and/or current market conditions and are not an exact indicator. What you will get will vary depending on how the market performs and how long you keep the investment/product. Investment may lead to a financial loss if no guarantee on the capital is in place.

SGMF= SEI Global Master Fund PLC

Past performance does not predict future returns. Returns may increase or decrease as a result of currency fluctuations.

Quick facts.

- Highly liquid and transparent: only trade listed futures
- UCITS
- Low and transparent fees
- Diversification benefits:
 - Can be long or short in any market depending on conditions
 - Lower equity correlation than the average hedge fund

SEI's Liquid Alternative Fund marries strategic and tactical approaches.

Slow-moving, strategic exposures

(6-24 months)

Seeks to replicate 50 leading hedge fund strategies

Event driven

Position for corporate action outcomes

Relative value

Profit from mispricing of related securities

Equity hedge long/short

Bet on equities moving up or down in price.

Fast-moving, tactical exposures

(2 weeks - 6 months)

Seeks to replicate 20 leading managed futures funds

Crisis alpha; Captures downside trends

Invest in interest rates, stock market indices, and foreign currency futures.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and/or current market conditions and are not an exact indicator. What you will get will vary depending on how the market performs and how long you keep the investment/product. Investment may lead to a financial loss if no guarantee on the capital is in place.

Our replication approach

In a daily liquid fund, we believe that liquidity management is paramount to avoid asset-liability issues like gating, or suspension of redemptions.

Vanilla futures contracts are typically highly liquid, historically even during periods of acute market stress, and have minimal counterparty risk.
