

EURO STRATEGIC PORTFOLIOS

An investment solution designed
to meet investors' financial goals.

SEI New ways.
New answers.®

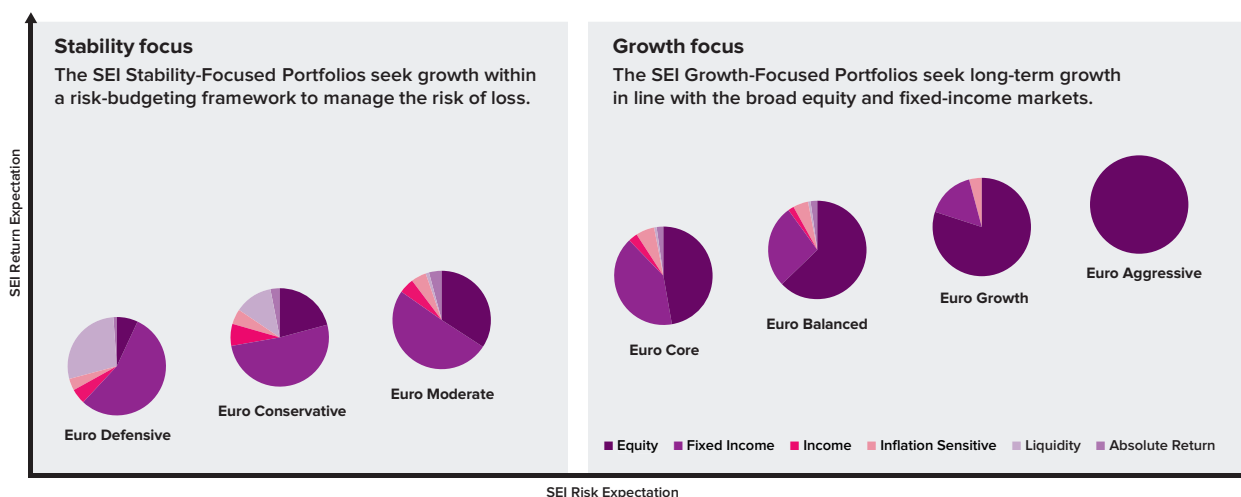

The SEI Euro Strategic Portfolios provide a core investment solution designed to meet a wide variety of investors' financial goals.

We recognise that investor goals are distinct and have different time horizons. The suite of seven funds fall into two groups: Stability-Focused and Growth-Focused.

The Stability-Focused Strategic Portfolios are designed for investors who are trying to protect against losses while working towards a comfortable level of growth. The Growth-Focused Strategic Portfolios are designed for investors whose goal is to steadily accumulate assets at a rate consistent with their risk tolerances relative to their goals.

Designed to suit a range of financial goals

The Euro Strategic Portfolios help you and your clients to take an objective investment approach with the aim of maximising returns, limiting volatility and managing investment risk.

As at 30 June 2017. For illustrative purposes only.

Five key benefits

- › **Unique goals-based approach.** Our approach means that success is measured against a range of investor goals and not against benchmarks alone. By focusing on achieving personal goals, investors are less prone to making irrational investment decisions that hinder their long-term performance.
- › **High level of diversification.** The asset allocation of each portfolio is designed to be well-diversified across up to six asset classes—equity, fixed income, inflation sensitive, income, liquidity and absolute return.
- › **Access to some of the world’s best managers.** Our team of approximately 100 analysts located worldwide selects some of the best from the entire universe of investment products, including institutional and boutique managers not usually available to the retail market.
- › **Continuous portfolio management.** Our analysts continuously monitor each manager’s philosophy, process, people and performance. SEI’s sophisticated technology enables us to monitor the portfolio holdings and trades to ensure that the portfolios are aligned with the overall strategy.
- › **Aligned to investor risk profiles.** Designed to cover a spectrum of investor risk profiles, the portfolios can be mapped to some of the market-leading risk profiling tools.

Inside a Euro Strategic Portfolio: the SEI Euro Core Fund

Diversification across asset classes and managers.

Target allocation weights are set at the discretion of SEI and are subject to change. As at 30 June 2017.

*The absolute return asset class aims to exploit active management opportunities that are not always accessible in conventional asset classes, such as equity, fixed interest or cash. This could involve, for example, investing in long (betting on price appreciation) and short positions (betting on price depreciation), to help generate profits or protect capital in both rising and falling markets.

*Holdings information as at 30 June 2017.

Our Euro Strategic Portfolios provide

- An investment solution designed to cover a range of investor financial goals and risk profiles
- Access to some of the world's best institutional investment managers
- Continuous, multilevel monitoring by a dedicated global team of approximately 100 investment professionals
- Exposure to up to six asset classes: equity, fixed income, inflation sensitive, income, liquidity and absolute return

IMPORTANT INFORMATION

The SEI Strategic Portfolios are a series of the SEI Funds and may invest in a combination of other SEI and Third-Party Funds as well as in additional manager pools based on asset classes. These manager pools are pools of assets from the respective Strategic Portfolio separately managed by Portfolio Managers which are monitored by SEI. One cannot directly invest in these manager pools.

This material is not directed to any persons where (by reason of that person's nationality, residence or otherwise) the publication or availability of this material is prohibited. Persons in respect of whom such prohibitions apply must not rely on this information in any respect whatsoever. Investment in the funds or products that are described herein are available only to intended recipients and this communication must not be relied upon or acted upon by anyone who is not an intended recipient.

SEI Investments (Europe) Limited acts as distributor of collective investment schemes which are authorised in Ireland pursuant to the UCITS regulations and which are collectively referred to as the "SEI Funds" in these materials. These umbrella funds are incorporated in Ireland as limited liability investment companies and are managed by SEI Investments Global Limited, an affiliate of the distributor. SEI Investments (Europe) Limited utilises the SEI funds in its asset management programme to create asset allocation strategies for its clients. Any reference in this document to any SEI funds should not be construed as a recommendation to buy or sell these securities or to engage in any related investment management services. Recipients of this information who intend to apply for shares in any SEI fund are reminded that any such application must be made solely on the basis of the information contained in the prospectus (which includes a schedule of fees and charges and maximum commission available). Commissions and incentives may be paid and if so, would be included in the overall costs.) A copy of the prospectus can be obtained by contacting your financial adviser, SEI relationship manager or by using the contact details shown below.

The funds may invest substantially in other funds. The risks described below may apply to the underlying assets of the products into which they invest: Investment in equity securities in general are subject to market risks that may cause their prices to fluctuate over time; fixed income securities are subject to credit risk and may also be subject to price volatility and may be sensitive to interest rate fluctuations; bonds or money market instruments are sensitive to inflation rate trends; Absolute return investments utilise aggressive investment techniques which may increase the volatility of returns. If the correlation between absolute return investments and other asset classes within the fund increases, absolute return investments' expected diversification benefits may be decreased.

While considerable care has been taken to ensure the information contained within this document is accurate and up to date, no warranty is given as to the accuracy or completeness of any information and no liability is accepted for any errors or omissions in such information or any action taken on the basis of this information.

Past performance is not an indicator of future performance. Investments in SEI funds are generally medium to long-term investments. The value of an investment and any income from it can go down as well as up. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Investors may get back less than the original amount invested. SEI funds may use derivative instruments which may be used for hedging purposes and/or investment purposes. This material represents an assessment of the market environment at a specific point in time and is not intended to be a forecast of future events.

This information is issued by SEI Investments (Europe) Limited ("SIEL"), 1st Floor, Alphabeta, 14-18 Finsbury Square, London EC2A 1BR, +44 (0)20 3810 8001. This document and its contents are directed only at persons who have been categorised by SIEL as a Professional Client, for the purposes of the FCA Conduct of Business Sourcebook. SIEL is authorised and regulated by the Financial Conduct Authority.

Allocations shown are SEI's target strategic asset allocations, which are based on our long-term expectations for the global markets and are derived from our capital market assumptions. In the short term, we may over- or underweight these positions as part of our active asset allocation, which aims to take advantage of short-term market opportunities. Please refer to the most current fact sheets for the funds' target active allocations, which more closely reflect the funds' current allocations.
