## SEI REPORTS FOURTH-QUARTER 2014 FINANCIAL RESULTS

*Income from Operations Increases 32 Percent*

**OAKS, Pa., January 28, 2015** -- SEI Investments Company (NASDAQ:SEIC) today announced financial results for the fourth-quarter 2014. Diluted earnings per share were \$.45 in fourth-quarter 2014 compared to \$.37 in fourth-quarter 2013. Earnings were negatively affected by an after-tax charge of approximately \$10.7 million related to the write down of an equity investment in a wealth services firm based in China. This charge was partially offset by the tax benefit derived from the reinstatement of the Research and Development Tax Credit during the fourth-quarter 2014 (see Fourth-Quarter Business Highlights for more information).

**Consolidated Overview**

## Fourth-Quarter Business Highlights:

- Revenue growth was primarily driven by higher Asset management, administration, and distribution fees from market appreciation and improved cash flows from new and existing clients. Our average assets under management, excluding LSV, increased \$17.4 billion, or 11 percent, to \$169.1 billion in the fourth-quarter 2014, as compared to \$151.7 billion during the fourth-quarter 2013.
- Our average assets under administration increased \$54.5 billion, or 17 percent, to \$372.4 billion in the fourth-quarter 2014, as compared to \$317.8 billion during the fourth-quarter 2013 (see attached Ending and Average Asset Balances schedules for further details).
- Sales events, net of client losses, during fourth-quarter 2014 totaled approximately \$23.1 million and are expected to generate net annualized recurring revenues of approximately \$20.0 million when contract values are fully realized.
- All four core business segments realized revenue and profit margin growth as compared to fourth-quarter 2013 results. Operating margins in all four core business segments improved primarily from increased recurring revenues generated from the higher levels of assets under management and administration.
- Income from LSV increased \$3.2 million, or 10 percent, to \$35.3 million in fourth-quarter 2014 as compared to \$32.1 million in fourth-quarter 2013 due to an increase in assets under management from market appreciation and an increase in performance fees earned by LSV.
- We recorded an after-tax charge of approximately \$10.7 million, or \$0.06 diluted earnings per share, during the fourth-quarter 2014 for the write down of our investment in Gao Fu, a wealth services firm based in China. The after-tax earnings per share impact is a result of the non-deductibility of the charge for U.S. federal tax purposes due to the investment in Gao Fu being held by an Irish subsidiary. This charge against earnings is reflected in Equity in earnings of unconsolidated affiliates on the accompanying Consolidated Statements of Operations.
- Stock-based compensation expense during the fourth-quarter 2014 decreased by \$6.9 million primarily due to the acceleration of expense recognition during the comparable period of 2013 for stock options that achieved performance vesting targets earlier than originally estimated.
- Amortization expense related to capitalized software was \$10.0 million during the fourth-quarter 2014 as compared to \$9.0 million during the fourth-quarter 2013 due to continued releases of the SEI Wealth Platform<sup>SM</sup>.
- Our effective tax rates were 33.3 percent in fourth-quarter 2014 and 35.2 percent in fourth-quarter 2013. The decrease in our tax rate was primarily due to reinstatement of the Research and Development Tax Credit, which occurred during the fourth-quarter 2014. This tax benefit was offset by the non-deductibility of a significant portion of the Gao Fu charge noted above.
- In fourth-quarter 2014, we repurchased 1.6 million shares of our common stock for \$62.6 million.
